3.. Data Shar...	0.04	1,909	82.72	954.5	0.09	-0.91

Key insights (Aug 2016)

- Overall efficiency: CVR 1.63%, RPS \$2.54, AOV \$184.94.
- High-efficiency traffic is concentrated in (not set) (likely direct/brand).
- Data Share drives sessions but shows negative simulated ROI.
- Recommended reallocation: shift budget from ROAS < 1 campaigns to ROAS > 1 with meaningful volume.

Note: Cost/ROAS/ROI are simulated for budget-allocation demonstration. GA sample data does not include actual ad spend or incrementality.
